Project Proposal

The Project Design Chart you completed earlier this week will help you move to the next and final phase of DISCOVER. Now it is time to choose your project. Remember, this is going to be a project you spend a lot of time on and you will become very knowledgeable about the subject. You are going to have to do some research into the topic and then develop your final project so this should be a topic you are truly interested in and are excited to do. You can change or refine your ideas from the *Project Design* activity but they should form the basis of your project proposal.

Before you choose your final topic consider the following questions:

- Will you be able to get the resources/materials you need to complete your project?
- Do you have the technology needed to complete your project?
- Do you have the skills or the ability to learn the skills you need to do this project?
- How will you collaborate with others?

[Complete this project proposal and then upload it to your Launchpad Profile.](#)

Project Title:

Storage for Pots and Pans

Project Product (highlight all that apply)

- App/Website
- **Invention/Prototype**
- **Experiment**
- Art
- Creative Writing
- Computer Science
- Music
- Digital media (film)
- Community Service
- Mindfulness
- Other (describe):
Pictures

What is your proposed project topic? (This can be the question you want to answer.)

Will the storage help keep the cabinets cleaner?

Why did you choose this project? What is your project inspiration?

I chose this project because I really wanted to learn how to use tools and build something so my dad asked if I wanted to help him as my “senior project” (that’s what he called it)

How will this project be a learning stretch for you? What will you learn by completing this project?

How to use tools and learning how to design

List the materials, supplies, technology and resources you will need to complete the project. (computer, iPad, paper, Arduino, poster paper, maps, baking supplies, music, ukulele, etc.)

Not sure, wood, nails, tools, ect...

How will you work with others during this project? What will you need from other people during this project?

My dad to help me build, get supplies and design

What do you plan to create for your final product? (Describe what you are going to produce. Is it a lab report of an experiment? A film? A website? An app? A work of art? This description should be specific and should be a fully developed paragraph.)

My final product will be a “prototype” of sorts. There will be some shelves and drawers to

help keep our pots and pans neater and more organized because currently some pots and pans are falling out of the cabinet and don't fit well into it. It will probably have a few drawers and some shelves to keep everything neat. I might create a film or slideshow of the pictures I take during the process to help show everything I do.
