

Intro

The New Radicals. Formed in 1997, they had a short two year career that is a wonder of the music world. Their only 2 consistent members were frontman and lead singer Gregg Alexander, as well as Danielle Brisebois, a former child actress whose roles consisted of background singing, as well as mixed time between keyboard and percussion. All others rotated in and out of the band. Another oddity of their career is their sound. Some songs are very pop-ish, while others are more rock based, with experimental guitar. A few songs even have a gospel feeling to it. But the most interesting thing about the New Radicals is that they released only one single before their breakup, and only released one album. This album, and single, would leave a legacy on listeners. It was called, "Maybe You've Been Brainwashed Too," and today I will be giving my thoughts on it.
