Project Title:

Making An Orchestral Song.

Project Product (highlight all that apply)

- App/Website
- Invention/Prototype
- Experiment
- Art
- Creative Writing
- Computer Science
- Music
- Digital media (film)
- Community Service
- Mindfulness
- Other (describe)

What is your proposed project topic? (This can be the question you want to answer.)

Can I make a professional sounding orchestral piece?

Why did you choose this project? What is your project inspiration?

I love using Ableton, a digital music software, to make music. Also, my friend and I like to make movies. I wanted to make an orchestral piece to use for our next movie.

How will this project be a learning stretch for you? What will you learn by completing this project?

I've used Ableton to make music before, but never orchestral music. By completing this project, I will learn how much different electronic music is from orchestral music.

List the materials, supplies, technology and resources you will need to complete the project. (computer, iPad, paper, Arduino, poster paper, etc.)

Computer, Ableton, and various digital plugins.

How will you work with others during this project? What will you need from other people during this project?

I will need feedback from others to understand how it sounds to other people. I want to make it the best it can be.

What do you plan to create for your final product? (Describe what you are going to produce. Is it a lab report of an experiment? A film? A website? An app? A work of art? This description should be specific and should be a fully developed paragraph.)

I plan to create an audio file of the orchestral song.
