Tick Tock

You've already chosen your destination so now it's time to create your map! To create this map first you will need to break your project into smaller steps or legs of your journey. Next you will have to estimate how much time you think each of these steps will take. Finally, you have to set deadlines for yourself to follow so that you can get to your destination on time!

[Upload your final Time Management Plan to your Launchpad Profile.](#)

Project Title: Making an Orchestral Song

| Task | Estimated time it will take | Due Date |
